

Forest Agricultural Management

St. Louis County Planning and Community Development

FAM

This district is intended to recognize and promote the development of the county's forestry and agricultural industry and to encourage recreational use of such areas. This district is typically used in areas with land developed at very low densities and often there is considerable government and corporate ownership. A low level of development is important in areas where this district is used since the uses encouraged in this district would be less compatible in a more urban setting.

Allowed

NO PERMIT REQUIRED	(If all administrative standards are me	t)								
-	k II - Including but not limited to:	Utility Facilities-Class I - Including but not limited to:								
- Personal & commercial bre	-	- Solar panel battery storage - Electrical lines
